

GOLDEN GATE NATIONAL RECREATION AREA

Ocean Beach Fires Update

September 2015

In order to correct the issues and concerns associated with recreational fires at Ocean Beach the NPS proposes to implement the Fire Permit System outlined below. The permit system would be piloted for a 3 year period with adaptive management practices in place.

The program would consist of the following main components:

1. Permit Reservation System

- Would use Reserve America's "Recreation.gov" system
- Could be obtained online or over the phone through the call center
- Would be available for two time periods daily, from 9am-3pm and 4pm-9pm
- Would cost between \$25 and \$35
- Permits would be made available up to 30 days in advance, with the ability to make a reservation within a few hours prior to the permit beginning
- Draft Permit Conditions:
 - Required for all fire pits at all times
 - Group size would be limited to 25 persons, with larger groups required to go through the existing Special Use Permit (SUP) process
 - Non-transferable
 - Permit holder would be required to be present at all times
 - Minimum required age for permit signatory would be 18 years old
 - Security deposits would not be required; however, full permit cost would be due upon reservation
 - Existing permits would be cancelled and no further permits made available if a Spare the Air Day is in effect
 - Per Reserve America refund policy, while permit cost would be refunded upon cancellation, processing fees would not be refunded

2. CCSF Support

- Thanks to the support of Supervisor Eric Mar, an allocation of \$185,000 has been given to San Francisco Recreation and Parks Department in the FY15-16 budget to support the Ocean Beach Fires Program
- Will provide support for necessary maintenance, trash removal, and cleaning associated with the fires

3. Seasonal Restriction

- NPS proposes a "rest period" for the beach from November through February, during which beach fires would not be permitted.
- This is in response to the Bay Area Air Quality Management District's request to consider a restriction during Winter Spare the Air Season
- Would also allow the park to marshal limited resources.
- Would lessen overall environmental impact of beach fires on the beach ecosystem and air quality
